

The diagram shows three orthographic projections of a mechanical part. The top-left view is a front elevation showing a conical body with a flared base, a central vertical shaft with a nut and washer at the bottom, and a mounting bracket at the top. The top-right view is a side elevation showing the same conical body from the side, highlighting a horizontal arm or pipe extending from the top right and a small rectangular feature on the lower right side. The bottom view is a top-down circular cross-section showing four internal holes arranged in a square pattern around the center, with a long cylindrical pin or rod passing through one of them.

The diagrams illustrate the components of a vacuum furnace. The top view shows a cylindrical chamber with a central vertical pipe and a flange at the bottom. The side view shows the chamber with a horizontal pipe on the right side and a flange at the bottom. The cross-section view shows the internal structure of the chamber, including a central vertical pipe and a flange at the bottom.

The image displays three orthographic views of a mechanical component, likely a pump or valve assembly. The top-left view is a front elevation showing a conical body with a flange at the top and a central outlet. The top-right view is a side elevation showing the same body with a side-mounted control or connection. The bottom view is a top-down perspective showing the circular base with four mounting holes and a central protrusion.

The image shows three orthographic views of a mechanical component. The top-left view is a front view showing a bell-shaped body with a horizontal arm on the left and a small knob on the right. The top-right view is a top view showing the bell-shaped body from above. The bottom view is a side view showing the profile of the bell-shaped body.

The image shows three orthographic views of a mechanical component. The top-left view is a front view showing a bell-shaped body with a flange at the base, a small knob on the right side of the flange, and a horizontal arm with a rectangular end piece extending from the top. The top-right view is a top view showing the bell-shaped body from above, with a central circular feature and a small rectangular protrusion at the top. The bottom view is a side view showing the profile of the bell-shaped body, the flange, and the horizontal arm.
