Wafer Style Check Valve

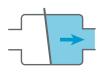

## Description

A.R.I. NR-010 Check Valve allows for one-directional flow, preventing the return flow of the liquid to its source and provides quiet closure and total sealing of the sealing face.

## > Installation

- Downstream of pumps and boosters
- Irrigation systems
- Fertigation systems
- On intake suction pipe
- Reservoirs

One Way

# **△ A.R.I.** NR-010

## Features and Benefits

| UV resistant polymers, reinforced and rubber materials      | corrosion and scale resistant, long working life  |
|---|---|
| Quick, spring-assisted closure                              | water hammer mitigation   |
| Specially chosen materials                                  | withstands highly abrasive conditions, long-term service in corrosive liquid environments |
| 1 ½", 2" models - removable cover                           | easy cleaning, maintenance and seal replacement without need to remove from the pipeline  |
| 3"- 10" models - spring assembly mechanism outside the flow | easily maintained without need to remove from the pipeline                                |

### > Technical Specifications

| Size range                      | 1½", 2" female threaded - BSPT / NPT<br>3"- 10" between flanges               |
|---------------------------------|---|
| Sealing pressure range          | 0.2 - 10 bar (sizes 1½" - 10")<br>0.2 - 16 bar (sizes 1½" - 8")               |
| Temperature                     | Maximum working temperature: 60° C  |
| For best suitability, it is red | commended to send the fluid chemical properties along with the valve request. |

Upon ordering, please specify: model, size, working pressure, thread/flange standard and type of liquid.

## Valve Selection Options

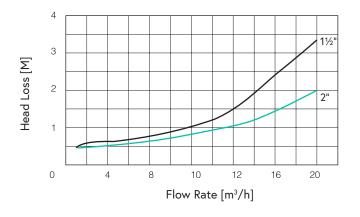

- Manufactured according to any standard flange requirement
- Limit switch add-on
- 1½", 2" model up to four 1/8" side ports for measuring pressure / pressure release cocks / command lines for external controls
- NR-010-LS limit switch transmits a contact signal at start or stop of flow
- NR-010-FV foot valve with screen (3"-10")

#### NOTE

For determining the height of a check valve with a limit switch, add an additional space of 2 - 3 cm.

All product weights and dimensions are approximate,

due to the differences in flange standards, materials and variable accessories.

## > Wafer Style Check Valve - Foot Valve

The A.R.I. NR-010 line of Foot Valves is a non-return spring-loaded check valve with a perforated screen. The valve is installed on the intake suction pipe below the water level, maintaining a full suction pipe.

Such an installation is essential in pumps that intake from a lower water level when the pump does not include a self-priming mechanism, which saves the need to operate vacuum pumps for pump start up.

## Foot Valve Screen Dimensions

| Nominal Size           | 3"    | 4"    | 6"     | 8"     | 8"     | 10"    | 10"    |
